## **Project aims**

Strengthening the collaboration between Gateshead College and four employers making different contributions to the digital sector.  
Improving curriculum design and delivery to provide a clear line of sight to work with learners.

Supporting teaching staff in updating their industry knowledge.

Enhancing learner induction through employer-led networking event

collaborative digital environment is the biggest challenge.

Remember that you are working towards a common goal. In this case the employer time commitment was significant; however, there was an understanding that they were contributing to the success of the industry.
